Adaptable design

ICGCommerce 3.0 is designed to be seen well, no matter the device or the size of the screen of this device.

Social networks

You will be able to promote your products in main social networks like Facebook, Twitter, Google+ and Pinterest.

Methods of paying

ICGCommerce 3.0 offers different payment types: by credit cards, paypal, cash on delivery, bank transfer, check...

Multilingual and multi-currency

You will be able to have the shop translated into different languages and you will be able to use any currency.

SEO Optimized

In order to achieve the biggest visibility in different browsers and to obtain the highest number of sales.

Integrated with ICGManager

Thanks to the integration with **ICGManager**, you can choose what information to send and when: items, clients, prices, prices rates, images, stocks, etc., how to order the items (by departments or by favorites), show photos of items and departments, define the texts, characteristics, and languages of the shop.

Don't waste time for shop maintenance:

- The stock will be shown updated.
- You will make your items visible with just one click.
- The clients and the prices will be sent automatically to the shop.
- The orders will be received in **ICGManager** automatically.
